SPRAY TANNING

Prepping For Your Tan

Consider When Booking : We recommend booking your OrganicTan **1-2 days prior to your vacation** or **1-3 days prior to your special event** (such as wedding or grad, etc.). Your **first appointment** will take approximately **45 minutes** to allow for your colour consult and any questions you may have throughout the appointment. Following appointments are usually **30 minutes or less**.

Ensure you **complete** any **waxing, sugaring** or **shaving** at least **1 day prior**. And your OrganicTan spray tan should be the **last step** in your beauty routine: be sure to **book your appointment after other beauty services** such as lash extensions, mani/pedis, hair wash/colouring appointments, etc. Rest assured we take extra precautions during the appointment to ensure lasting results with your other beauty treatments.

Prepping Your Skin : **6 hours** or more **prior to your appointment shower** and **gently exfoliate your face and body** using your SunnaTan exfoliating mitt. If you don't have one, just be sure to use a face cloth or loofah - **no fancy scrubs, exfoliants or oils**. Oil-based exfoliates or lotions will block the tanning process, leaving a residue between your skin and the tanning solution. Avoid applying lotions/oils to your skin following your shower. **Come to your appointment without make-up or lotions - clean skin is best!**

What to Wear : Wear **dark, loose-fitting clothing** following your appointment (moisture-wicking sport-wear is not recommended). We also recommend **avoiding white clothing** - there is little to no rub-off bronzer, but it's always **best to be safe**.

During your tan, you may be in whatever state of undressed **you are comfortable with**. Some options are: a bathing suit, strapless bra or bandeau, topless, or nude. **Keep in mind the tan lines you want or do not want to have** - especially for special occasions or beach vacations.

Allow Your Tan to Absorb and Develop : Remember you will need to **avoid contact with liquids** or **any activities** that will result in **sweating for up to 24 hours** following your appointment to allow the solution to absorb and develop. Please plan accordingly. Another important consideration following your appointment is **limiting skin-to-skin contact during the development period**. Breastfeeding mamas - this takes some extra planning.

Avoid a Sunburn : It is important to ensure you do not come to your appointment with sunburned skin. **Sunburned skin has been damaged and will often peel/flake, affecting your sunless tan.**

Spray Tanning

During Your Session

Consult : Every OrganicTan experience begins with a **brief consultation**. Our goal is to ensure your **skin looks naturally sun kissed**. Your unique shade is **custom-blended based** on your **natural skin type, tone, features and preference**.

Prep : Following the consultation, your OrganicTan artist will take care of all of the prep by **paying special attention** to the areas of the body that **don't naturally tan** (including lips, the palms of your hands, nails/cuticles, and feet) as well as areas of the body that can be giveaways of a "fake tan", such as elbows, hands, knees, etc. This **prevents unnatural colouring**. We strive to ensure your tan looks as **natural** as possible.

Spray Tan : After carefully preparing your skin, your OrganicTan artist will guide you through a routine of **simple poses** that have been strategically designed to ensure **flawless coverage** that compliments the **natural curves** and **composition of your body**.

Post Tan : Finally, your OrganicTan artist will ensure all areas of the body are **blended**. You will feel wet/sticky for 2-3 hours following your appointment, but we **brush your body's natural creases** with a **drying powder** to help ease that sticky feeling during the drying process.

You can **immediately** get dressed after being spray tanned. We highly recommend wearing **dark, loosely fitted clothing** following your appointment to ensure your OrganicTan isn't rubbed or disrupted by tight clothing.

Aftercare

WITH PROPER CARE, YOUR TAN WILL LAST APPROXIMATELY 7-10 DAYS

Don't Get Wet : For the **first 12 hours post-tan** avoid any activities that will result in **sweating or getting wet** (it's the perfect excuse for not doing the dishes). During this time, **avoid showering** (obviously) and **try to wash only your palms when washing your hands**. Try not to wash the **tops of your hands** for at least **3-5 hours**.

Limit Skin-To-Skin : During this time you will also want to **limit skin-to-skin contact with yourself** (crossing your arms or legs) and **others** (cuddling, breastfeeding, etc.) to **avoid colour transfer**.

Wear Loose Dark Clothing : Continue to **wear loose, dark clothing to bed**. The bronzer may transfer to your bedding and clothing, however, **nothing will stain**. We still recommend avoiding white wherever possible.

Aftercare Continued

Extra Tips:

+ **MAXIMUM results** can be expected when you allow your tan to develop for the **full 24 hours** prior to showering. The bronzer (don't panic - you're not losing your tan) will **rinse off in your first shower**. Bonus: apply our signature **SunnaTan coconut oil** to your whole body prior to having your first shower. This will help **lock in your colour, leave your skin super hydrated, AND create a protective barrier** between your skin and other products you may use in the shower.)

+ You can still **shave** while you have a tan; however, we **do not recommend doing it daily**. Bonus: **always use a new razor** and apply our signature **SunnaTan Coconut Oil** to the specified area to act like a shaving cream that will **hydrate your skin** while creating a barrier between the razor and your skin.

+ Use our mild **hydrating SunnaTan Body Wash** for the duration of your tan. **Do not use soaps and body wash with exfoliating beads or synthetic fragrances containing alcohol.**

+ **Keep your skin hydrated.** Use lotions that are **without synthetic fragrances and alcohol.** Try to moisturize **at least twice a day.** We recommend the use of our **SunnaTan skin care products** to help extend the life of your tan and prep your skin for your next airbrush tan.

Want to Take it to the Extreme?

+ Drink plenty of water

+ Use our **SunnaTan sunless tan extenders** (Keep Me Golden or Colour Me Dark) and **tanning mitt** to give new life and prolong the length of your tan.

+ When your **tan has faded, lightly exfoliate** (using our SunnaTan Buff Me, an exfoliating mitt) to help **even out your skin tone.**

Professional yet comfortable!

“ I had a wonderful first experience with [Halo Exclusive]! I was provided with all the info and tips I needed and was recommended the best colour choice for my natural skin tone. I was given step by step instructions throughout the entire session. Getting a spray tan can make you feel very 'exposed' yet I was made to feel extremely comfortable! I will definitely be a returning customer.”
